Research Papers

Spatial variability of acid sulphate soils in the Plain of Reeds, Mekong delta, Vietnam
O. Husson, P.H. Verburg, M.T. Phung and M.E.F. Van Mensvoort 1

Soil remediation decision making in presence of uncertainty in crop yield response
T. Faechner, M. Pyrcz and C.V. Deutsch 21

Study of spatial relationships among some soil physico-chemical properties of a field in central Italy using multivariate geostatistics
A. Castrignanò, L. Giugliarini, R. Risaliti and N. Martinelli 39

Salt-affected soils under rice-based irrigation agriculture in southern Kazakhstan
S. Funakawa, R. Suzuki, E. Karbozova, T. Kosaki and N. Ishida 61

Sorption of Brilliant Blue FCF in soils as affected by pH and ionic strength
J. Germán-Heins and M. Flury 87

Integrated Toposequence Analyses to combine local and scientific knowledge systems
A. Gobin, P. Campling, J. Deckers and J. Feyen 103

Vesicular–arbuscular mycorrizae for dating multiple paleosols and carbon loss rate determination
J. Holmqvist and P. Schlyter 125

Effects of mapped variation in soil conditions on estimates of soil carbon and nitrogen stocks for South America
N.H. Batjes 135

Book Review 145

Special Issue

PEDOMETRICS '98

Preface 147

IUSS Working Group on Pedometrics Symposium

Is soil variation random?
R. Webster 149

Estimation or simulation of soil properties? An optimization problem with conflicting criteria
P. Goovaerts 165

Predicting soil properties over a region using sample information from a mapped reference area and digital elevation data: a conditional probability approach
P. Lagacherie and M. Voltz 187

Two soil profile reconstruction techniques
A.B. McBratney, T.F.A. Bishop and I.S. Teliatnikov 209

The influence of variogram parameters on optimal sampling schemes for mapping by kriging
J.W. van Groenigen 223

Using AVHRR images for spatial prediction of clay content in the lower Namoi Valley of eastern Australia
I.O.A. Odeh and A.B. McBratney 237
Comparison of kriging with external drift and simple linear regression for predicting soil horizon thickness with different sample densities
H. Bourennane, D. King and A. Couturier 255
The effect of cultivation on the spatial variability of selected properties of an umbric horizon
A. Paz-González, S.R. Vieira and M.T. Taboada Castro 273

Symposium 17 of the 16th IUSS World Congress

An overview of pedometric techniques for use in soil survey
A.B. McBratney, I.O.A. Odeh, T.F.A. Bishop, M.S. Dunbar and T.M. Shatar. 293
Updating the (1:50,000) Dutch groundwater table class map by statistical methods: an analysis of quality versus cost
P.A. Finke 329
Three-dimensional GIS cartography applied to the study of the spatial variation of soil horizons in a Swiss floodplain
M.L. Mendonça Santos, C. Guenat, M. Bouzelboudjen and F. Golay 351
Use of combined digital elevation model and satellite radiometric data for regional soil mapping
E. Dobos, E. Micheli, M.F. Baumgardner, L. Biehl and T. Helt 367
Soil resistivity: a non-invasive tool to map soil structure horizonation
A. Tabbagh, M. Dabas, A. Hesse and C. Panissod 393
Improving soil hydromorphy prediction according to DEM resolution and available pedological data
V. Chaplot, C. Walter and P. Curmi 405
